Who Am I?

Hi! I'm Maneesha Dilshadi, a web design enthusiast and a passionate student eager to create visually appealing and user-friendly websites. With a solid foundation in HTML, CSS, and JavaScript, I enjoy designing responsive web pages that provide a smooth user experience.

As a learner, I'm always exploring UI/UX principles, web development trends, and creative design techniques to improve my skills. I love turning ideas into digital experiences and working on exciting projects that challenge me to grow.

Beyond coding, I enjoy browsing design inspirations, experimenting with new web technologies, and taking on side projects to sharpen my skills. I'm always open to learning, collaborating, and gaining real-world experience in web development.

My Skills

Web Design & Development

Proficient in HTML, CSS, and JavaScript, focusing on creating websites that are both beautiful and functional.

UI/UX Design

I implement user-centered designs that prioritize usability and offer seamless experiences across platforms.

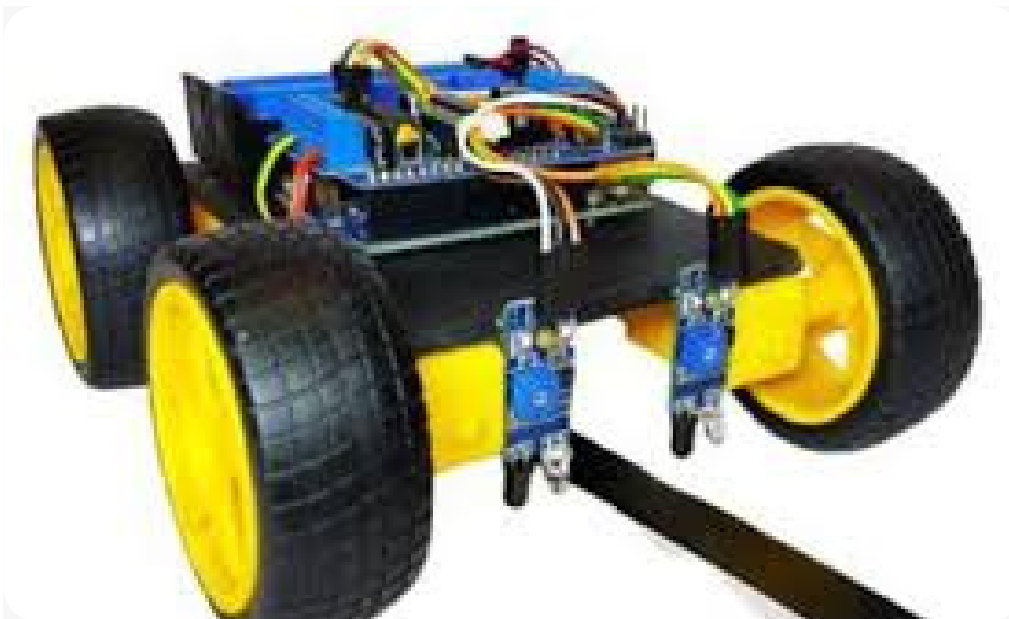

Responsive Design

I build responsive websites that work seamlessly on mobile, tablet, and desktop devices.

Creative Problem Solving

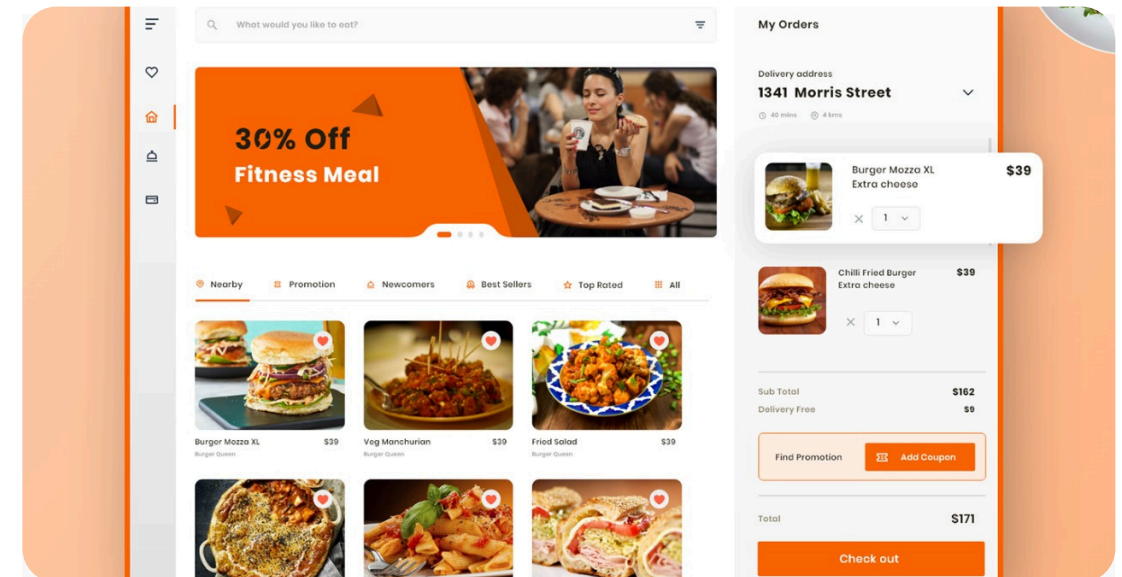

I love tackling challenges with creative solutions that enhance user experience and make interfaces intuitive.

My Projects

Project 1

Designed and developed a line following robot that won a robotics competition. Focused on automation and problem-solving. Used the Arduino and sensors.

[view Project](#)

Project 2

Developed a user-friendly online food delivery system that allows customers to browse menus, place orders, and track deliveries in real time. The app ensures a smooth ordering experience with secure payment options and a responsive design. used the figma.
